

## Dr. Bruce Ivey

---

Bruce Ivey is a professor emeritus of computer science and physics at Pacific Union College in Angwin, California. His degree in physics was from Andrews University in Michigan, followed by master's degrees in science education and computer science and a doctorate in adult and higher education/computer science from Montana State University. Bruce's main research interest has been software development, first with the audience-interactive simulations of natural resource systems of John Amend's research projects at MSU, and more recently the chemistry lab data acquisition systems of MicroLab.
